"Passionate about crafting intuitive and seamless native apps that prioritize simplicity and ease."

SKILLS

- **Swift** programming language.
- Building UI with **SwiftUI** using **Stacks, Lists, Forms, ScrollViews, and Grids**.
- Working with multithreading using **GCD Framework**.
- Working with **REST API**.
- Storing data locally using **UserDefaults** and **Core Data**.
- Communication between SwiftUI Views and UIKit Views using **UIViewRepresentable**.
- Cloud **Firestore** integration.
- Working with **AWS Amplify**.
- Working with **MVVM** design pattern.
- Version control using **Git** and **BitBucket**.
- Familiar with **Human Interface Guidelines**.

EXPERIENCE

Xellier Networks, Bengaluru (Remote) - Application Developer iOS

SEPTEMBER 2022 - PRESENT

- Developed and launched a **CCTV monitoring app** ([App Store link](#)) from scratch that provides live video feed streaming, event videos and intruder alerts using **Swift** language and **SwiftUI Framework**.
- Implemented **custom video player** with **custom controls** to provide **live video playback** functionality using **AVFoundation Framework**.
- Worked on **AVPlayer** for persistent videos.
- Integrated **AWS Amplify** for backend communication, enabling seamless integration for real-time data syncing and app functionality.
- Implemented **real-time notifications and alerts** to keep users informed of any security incidents.
- Developed **responsive UIs** for the app using **SwiftUI** and **UIKit**.

- Integrated **UIViews** and **UIViewControllers** using **Representable protocols** for **two way communication** between SwiftUI's Views and UIKit's UIViews.
- Worked on **content filtering** and **data sorting**.
- Integrated **third-party libraries** like Fastis Date Picker using Swift Package Manager.
- Implemented version control using **Bitbucket**.

EDUCATION

Mohanlal Sukhadia University, Udaipur - *Bachelor of Computer Applications (BCA)*

JULY 2017 - MARCH 2021

Fundamental and advanced understanding of Information Technology and Computer Applications.

COURSES

100 Days of SwiftUI by Paul Hudson

JUNE 2022

Creating iPhone apps using Swift and SwiftUI

DESIGN RULES: Principles + Practices for Great UI Design, Udemey

MARCH 2022

Principles and applications of hierarchy, color, contrast & typography in UI Design.

Figma Essentials, Udemey

FEB 2022

Create wireframes and other UI components.

Working with Constraints.

TOOLS

Git, BitBucket

Version Controlling

Figma

Developing User Interfaces

HOBBIES

Meditation
